

As an IT software, services and management consulting provider, Tyrula helps its clients succeed by ensuring that their solutions, IT resources and process improvement initiatives properly align with the clients’ core mission. Tyrula LLC is a small, minority, woman owned business with fifteen years of experience in research and information technology.

Tyrula Software

Tyrula has three products for Extract, Transform and Load (ETL) processes and Enterprise Content Management (ECM).

eCS Suite – eCS software is used to create ETL solutions by configuring and connecting 34 distinct modules. The solution can be configured to run in parallel and process millions of transactions a day. eCS is used for data migration and operational efficiency.

RAMP – RAMP is an exchange solution that allows health insurance companies to communicate and transfer data with health care providers. RAMP is compatible with most Electronic Medical Record (EMR) systems in the market and can process electronic, faxed and paper data.

mobile-eXam – mobile-eXam is a customized EMR that allows health plans to engage their population in a clinical setting. This helps quality and population health management initiatives by engaging patients who typically are not interacting with health care providers.
