HEALTH PLANS, SAVE MONEY AND SPEED UP YOUR CHART RETRIEVAL PROCESS!

RAMP

Tyrula's RAMP solution helps health plans maximize revenue for HEDIS and Risk Adjustment.

What is RAMP?

RAMP is a conduit pipe that securely transmits medical records from the provider to the payers. The solution simplifies communication, prioritizes high risk patients, and helps the provider accurately document the encounter.

Why choose RAMP?

Whether you need charts for HEDIS, Risk Adjustment, or auditing purposes, RAMP will allow you to receive secure medical records faster and at a lower cost. In addition for Risk Adjustment, RAMP will encourage providers to accurately document correct diagnoses, increase their visibility on incentives, and increase transparency between the payer and provider."

RAMP will:

- Minimize provider abrasion and increase adoption
- Reduce the cost to retrieve a chart
- Consolidate mail and fax into RAMP process
- Enable record retrieval in days and not in weeks/ months
- Eliminate the difficulty in obtaining medical records from geographically distant providers
- Offer provider the visibility into your P4P initiatives to encourage them to focus on high risk members
- Help manage incentives at member and practice level
- Give providers real-time member information at their fingertips to raise risk scores
- Provide built-in evidence based on best practices for HCC confirmation to help providers correctly code chronic conditions the first time
- Provide insight into HCC confirmation across your provider base by using dashboards and reports, helping you to identify gaps and to allocate resources efficiently

What people are saying about RAMP

"RAMP solves the challenge of getting providers to send medical charts to us, irrespective of the EMR system they use. With RAMP we are able to get over 85% of the medical records for our members. It formats the data so that it can also be used by other departments and systems. As it has retrospective and prospective modes, the quality of the data helps us confirm more HCCs."
